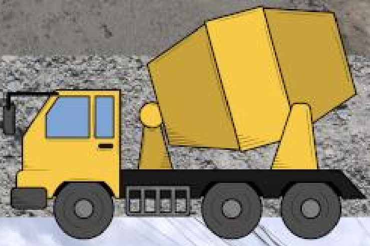
PROJECT UPDATE



Concrete Restoration at Brgy. Bintog - Mariano St.

Concrete Restoration at Brgy. Banga 1st and Poblacion Dike

Front Row (L-R): Carlo Jose David, Rufino Adriano Jr., Enrico Omedes, Rafael Vasquez, James Magbag, John Paul Mariano.

Back Row (L-R): Philip Vinluan, Jericho Flores, Jumar San Pedro, Alvin Santiago, Albert Ramos, Engr. Dan Angelo Madariaga, Emiterio Felicitas, Alexander Paulate, Elyzette Bernardo.

WATER GENERATION AND DISTRIBUTION SECTION (PRODUCTION SECTION)

Ang PLAWD ay kasalukuyang mayroong pitong (7) gumaganang pumping stations – Tabang, Bintog, Sipat, Parulan, Bulihan, Plaridel Heights, at Sitio Santiago. Bukod sa mga pumping stations, mayroon ding dalawang (2) interconnection points sa Bulihan at San Jose na kung saan ay kumukuha ng tubig mula sa Luzon Clean Water Development Corporation (Bulacan Bulk Water). Ito ang mga pinagmumulan ng tubig na sinusupply sa labing-siyam (19) na barangay ng Plaridel, Bulacan.

Ang mga nasabing pump stations naman ay mayroong assigned pump operators. Sila ang responsable sa pagkuha, pagtala, at pagbibigay ng mga data katulad ng flow, pressure, current, voltage, frequency, at pumping water levels. Sila rin ang ang nag-aadjust ng chlorine dosage upang masiguro na ang tubig na aming sinusupply ay potable o ligtas at pasado ayon sa Philippine National Standards for Drinking Water of 2017 (PNSDW 2017). Ang mga pump operators din ay nagsasagawa ng basic maintenance and troubleshooting at nagpapanatili ng good housekeeping sa mga pumping stations.

Bagama't mayroong ilang bahagi ng Plaridel ang nakakaranas ng mahina hanggang sa walang supply na tubig, ang pamunuan ng PLAWD ay gumagawa ng paraan para maiayos ang lumang network, madagdagan ang supply ng tubig at makapaglagay ng mga pipelines na makakapagdala ng malaking volume ng tubig sa mga lugar na walang supply. Ang mga kasalukuyang malaking proyekto ng PLAWD ay ang Water District Development Sector Project na nabuo sa pangunguna ng Local Water Utilities Administration (LWUA) at pinondohan ng Asian Development Bank (ADB). Binubuo ng proyektong ito ay ang pagtatayo ng dalawang (2) 1500 cum. na ground reservoirs, sa Banga 1st at Rueda at paglalatag ng 40.5 kms na pipelines na sasakop sa 19 na barangay para maiayos ang supply ng tubig at magpapaganda ng serbisyo ng PLAWD.
